### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with George L. Snider on 11/08/04.

The application has been amended as follows:

**Title (New):** "Apparatus for treating cytological or histological specimens"

**Claim 29.** (Amended) An apparatus for treating cytological or histological specimens comprising:

- a plurality of processing stations;

- an object holder for carrying at least one specimen, wherein the object holder includes a pair of hooks on opposite sides of the object holder;

- a transport device for delivering the object holder into and out of the processing stations, wherein the transport device includes:

- a robot arm having a free end movable in three-dimensions;

- a gripper mounted at the free end of the robot arm for releasably grasping the object holder, wherein the gripper includes a pair of slots for respectively receiving the pair of hooks of the object holder, each of the pair of slots having a downwardly-facing open end; an actuation member movable to and from a closure position wherein the actuation member closes the open end of each of the pair of slots; and
- a rotatable switching cross engaging the actuation member, wherein a rotational position of the switching cross determines whether the actuation member is in the closure position or away from the closure position, and wherein the switching cross is rotated by engagement thereof with the object holder;

- wherein the gripper is actuable to grasp the object holder by lowering the free end of the robot arm to cause the gripper to engage the object holder while the object holder resides in one of the processing stations; and

- wherein the gripper is actuable to release the object holder by lowering the arm

end of the robot arm beyond a position at which the object holder resides in and is supported by one of the processing stations.

**Cancel claim 30.**

In **Claim 31**, change [30] to -- 29 --.

2. The following is an examiner's statement of reasons for allowance:

the prior art does not teach or fairly suggest an apparatus for treating cytological or histological specimens comprising a robot arm with a free end movable in three dimensions with a gripper mounted at the free end of this arm and having specific details recited in the amended claim 29.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
